

Vote for the climate!

miljöpartiet de gröna

CITY OF STOCKHOLM

Stockholm's only climate party

The world is facing an urgent environmental and climate crisis. The Swedish Green Party wants Sweden's capital city to be a global role model. We want to eradicate Stockholm's fossil emissions and let asphalt give way to green.

The Green Party is working for a vibrant Stockholm, where the air is fresh to breathe and the streets are filled with movement. We want to build a more wonderful city that is better for the planet.

Which future will you choose?

With your vote, we can:

- Create four new nature reserves in Kyrkhamn, Fagersjöskogen, Ålstensskogen-Storskogen and Majroskogen.
- Close down Bromma Airport and build Bromma Park City with at least 30,000-50,000 homes.
- Produce more renewable energy, using solar panels and offshore wind power.
- Establish an electric vehicle zone in the city centre and Gamla stan.
- Plant more trees and make it easier to develop urban agriculture.
- Create ten new summer pedestrian streets and at least five permanent pedestrian streets.
- Build more bathing sites and winter bathing sites with saunas.
- Make Stockholm a green city for pedestrians and a world-class city for cyclists.
